WEBD 236 Homework 12

Answer the following questions based on your reading of the text book, any supplemental material, and the instructor's presentation this week. If you use an external source (i.e. a web-page, the required textbook, or an additional book) to help you answer the questions, then be sure to cite that source. You should probably always be citing a source.

Essay

1. **[10 points]** Examine one other web framework for PHP (i.e. CodeIgniter or Yii). Compare and contrast this framework with Cake (discussed in class). Address the services it provides, the documentation available, the philosophy behind the framework, etc. How do these frameworks compare to our simple MVC framework developed in class?

2. **[10 points]** Examine a templating language for PHP (i.e. Smarty, Dwoo, etc.). Compare and contrast this framework with the simple templating language developed in class. What additional features do these frameworks provide (i.e. internationalization support, etc.)

Submission instructions

Create a single Word document with the solutions to the questions. Submit this document to the drop dropbox for the course.
