## Student Chapter at Franklin University

girls get **IT**

The ACM-W Student Chapter at Franklin University has one primary goal – promote information science and computing careers to young women.

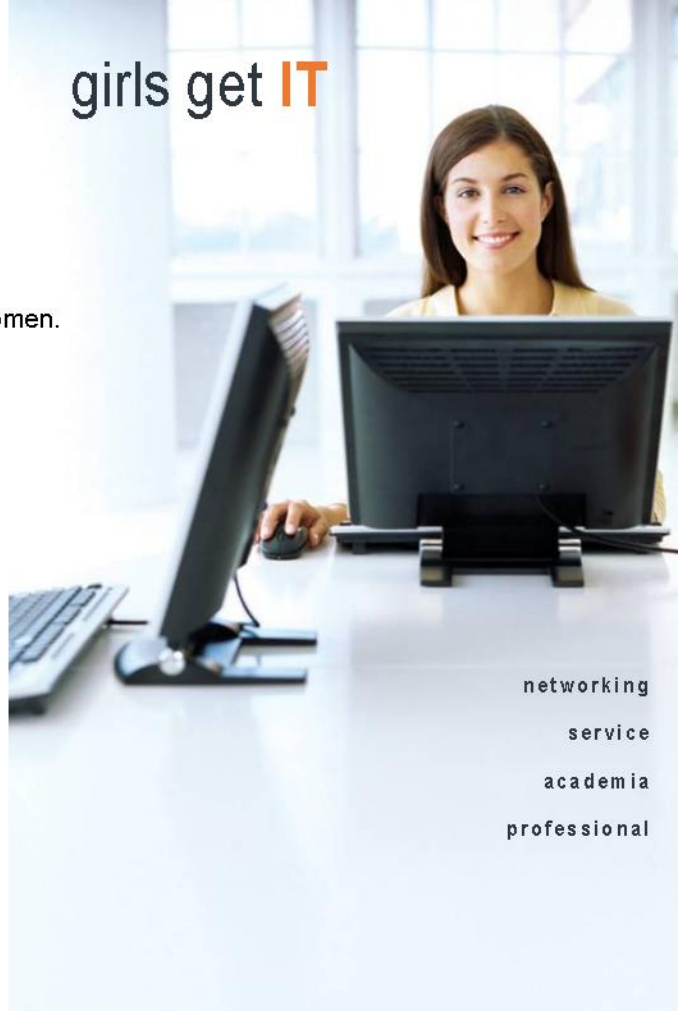

Study after study shows that many girls do not pursue science or engineering fields because they think they cannot do it.

ACM-W says they can. In fact, new studies show that corporations prefer to hire *women* in technology fields (*as reported in ACM TechNews*).

The ACM-W Student Chapter of Franklin University is an active organization. Led by students, for students, the chapter has four ongoing initiatives:

- ◆ Provide a networking avenue with peers,
- ◆ Commit to service in the community,
- ◆ Promote academic excellence, and
- ◆ Prepare members professionally for after graduation goals.

Among other things, this chapter has fun!
