Action Items   *LINUS T.*

Action Item	Status
1. Conduct research on your selected person. Your research should be at least 75% textbook based (i.e. not all Web based). Consider using sources such as OhioLink; journals from sources such as ACM, IEEE, or magazines such as Time and Newsweek, and you could also use national and international newspapers as resources. As you conduct your research consider the following: • In which country was your chosen person born? • Where did they spend most of their time and where were they educated? • Analyze one of the contributions made by your chosen person. • How did your particular person's contribution(s) affect the direction in which the field of Information Technology developed? • In what way can individual's contributions to information technology be considered "gestalt" in nature? • Predict how other developments in Information Technology would have been hindered or prevented without your person's contribution(s)?	Missing (Incomplete) Complete *NOT SURE THIS WAS ADDRESSED AT ALL*
2. Compile your research on your chosen person into a 10-15 slide PowerPoint presentation. Your presentation should encapsulate your finding to Action Item 1. Remember the audio feature of PowerPoint. You may record your narration if you wish or you may use the notes feature of PowerPoint to enhance the content of your slides.	Missing Incomplete Complete
3. Cite all of your sources according to APA citation guidelines. See Writing Guidelines for information on APA. Your citations should reflect your use of text based resources rather than Web-based. Your reference page should be the final slide(s) of your presentation.	Missing Incomplete Complete
4. Submit your presentation to turnitin.com and make any necessary amendments to the presentation after receiving the turnitin feedback.	Missing Incomplete Complete
5. Publish your presentation to the Freud server.	Missing Incomplete Complete
6. Go to the class Bulletin Board. Your professor will have created a series of topic areas all named chronologically by decade (e.g., 1940, 1950 etc.)	Missing Incomplete Complete
7. Post the URL to the appropriate topic according to when your chosen person's major contribution to Information Technology occurred. For example, if you were researching Englebart, his major contribution was the mouse and this happened in the 1960's, so you would post your URL to the topic "1960".	Missing Incomplete Complete

Comments / Feedback:

Well Done! Muns
See Action Notes.

Score Card

Note that grammar, spelling, citations, and writing mechanics do not contribute to the total points for this assignment; however, improper grammar, poor spelling, incorrect citations, or poor writing mechanics may result in significant point deductions.

Content of Presentation (/40):   36

Quality of Relevant Research (/10):   10

Late Points (deducted):

Writing Quality/Presentation (deducted):

Total (/50)   46

Expectations and Tips for Future Assignments:

1. All assignments will be submitted on or before the posted due date
2. Review any late-breaking assignment-related announcements or details on the course site before starting any assignment
3. All Assignments will have a _Cover Page with Student Name, Assignment Name and Number, Course and Session Info, Professor Name and current date_
4. All assignments will have page numbering (page 1 of #)
5. Writing quality will be appropriate for capstone-level students
6. Unless specifically required, avoid first person voice (I, me, my, etc.).
7. All third party content will be appropriately sourced, cited and referenced according to APA format
8. All papers will be reviewed and checked for grammar and spelling
9. Students who struggle with written English should avail themselves of Franklin Student Learning Center proofing service that is available to all students
10. Please refer to the course syllabus for details regarding late penalties on assignments
