Hi all

Attached are the Time-Cost Tables. Take a look at the hours that were expended and see if they should be adjusted. If not, then the tables are ready to go.

The drawing that I am doing will not be finished until tomorrow. As I stated before, I did not realize I do not have Visio. I have been the only one in the office this week and just as my luck has it, this has been a very busy week for us. The other 2 people in my office are out with strep throat and fever. It is going around here in Newark. I will try and have it completed by tomorrow.

Take care  
Eric

Hello All

I done with the Visio diagram but have problem with the size of the café room. I will fixed today or tomorrow noon.  
In the attach file you will see the visio diagram.

Thanks

Abdalla

Abdalla,

I never saw your modified visio. Did you send it yet? You really need to clean up the arrangement of the tables too so it doesn't look so chaotic.

Eric,

You need to recheck your numbers. On the build and initial config you show 80 hours for each device. That is not correct per the project plan which you need to play close attention to. You have a "Build" section and a "Build and Initial config" section. There is not both, only one. Mirrof the project plan and it will be good.

We also will not have the hardware installation numbers yet. The date of the status rpt is Feb 22 so there is no way the installation will be complete. Please doublecheck that document.

Dave,

"On the build and initial config you show 80 hours for each device." I took the numbers that were under the "Receive" section and thought this was the assembly of the switches once they came in. I did not know how to label the section so I used "Build" which seemed to go more in line with what I thought was happening. I can change it to "Receive" but for me it does not click. It could be me though.

"We also will not have the hardware installation numbers yet." I changed it to match the project plan. I looked at the start date instead of the end date.

Updated table is attached.

Eric
