

COMP 101 – PROBLEM SOLVING WITH COMPUTING

HOMEWORK #3 (5-1)¹ [25 PTS]

TASKS:

Answer the following questions:

Chapter 3:

- a. True/False questions #1, 2, 3, 4 starting page 108 [4 pts]
- b. Algorithm Workbench problems #1 and #4 on page 109 [8 pts]

Chapter 4:

- c. Multiple Choice questions starting on p. 146, #3, 4, 8, 9 and 10 [5 pts]
- d. Algorithm workbench p. 147, #2 and #3 [4 pts each]

No need to copy back any of the questions, just present your answers in an orderly manner.

DELIVERABLES :

One MS Word document containing the answers all of the questions.

For part d. **test your function separately in IDLE** and once it works, *only then* copy it into your Word document that you will submit.

You must use either **single line-spaced Courier** or **Consolas** non-proportional font for all of your code listings if they are part of MS Word, otherwise your indentation etc won't show up correctly and you will lose points for syntactically incorrect Python. Using the default Times Roman font will *not* work for code listings.

¹ The number in () corresponds to the assignment number on the Franklin University web page and should be used when you submit your assignment via dropbox for proper credit.
